SUMMARY

A detail-oriented Mobile Developer with 7 years of experience designing, developing, and maintaining mobile applications for Android. Proficient in Kotlin, Java, with a track record of delivering scalable and user-friendly solutions. Experienced in Agile/Scrum environments and cross-functional collaboration.

SKILLS

Java, Kotlin, Design Pattern, MVVM/MVI architectures, Android, UI/UX Design, Team Leadership, Collaboration, Project Management, Client Meeting, Unit Testing, Debugging, Performance Optimization, Figma, Play Store release process, Android Jetpack (ViewModel, LiveData, Navigation, Room), Git.

PROJECTS

- Fit India** [play.Store link](#)
The Fit India Mobile App is one of its kind App wherein citizens can assess their fitness parameters through a series of simple tests and further get ways for the improvement of fitness on regular basis. Additionally, Fit India Mobile App is having features like setting daily activity and fitness goals, activity tracker, water intake, calorie intake and sleep tracker etc.
- NextGen mParivahan** [play.Store link](#)
This government app offers citizens instant access to transport services via mobile. It enables all-India RTO vehicle registration searches, providing complete details about registered vehicles. Aimed at enhancing convenience and transparency, the app includes various transport utilities, making interactions with the transport sector seamless, efficient, and user-friendly.
- NSRS(NATIONAL SPORTS REPOSITORY SYSTEM)** [play.Store link](#)
The mobile application of National Sports Repository System envisages to provide for a leaner version of web platform of NSRS. As of now NSRS mobile application provides facility for profile changes, data recording by respective stakeholders for Performance Assessment and Sports Science tests for Athletes.
- Pasco Digital** [play.Store link](#)
Digital, is the use of a computer system and software to store, manage and track electronic documents and electronic images of paper-based information captured through the use of a document scanner.

EXPERIENCE

06/2022 – Present **NetProphets Cyberworks Private Limited (Senior Software Engineer)**

- Performing thorough code reviews to maintain code quality and consistency
- Analyzing system performance, identifying bottlenecks, and implementing optimization
- Working with crossfunctional teams like product management, design, and QA.

Skills

Testing and debugging, Retrofit, Kotlin, Room, Push Notification, MVVM, Data Binding, Google Maps, XML, Constraint Layout, Material UI, Face Detection, Sensor, Team Management, Third Party Libraries Integration, Social Login, Requirements gathering, Agile Methodologies, Coroutines, Client Meeting.

04/2021 – 06/2022 **RSJ Inspection Service Limited (Mobile Application Developer)**

- Role is to add new module into the app and optimise the existing ones.
- Gather requirements from the director analysis that implement that feature
- The role was to revamp their existing app into a better version of it. With better UI/UX experience
- Security implementation for mobile app using Certificate Pinning, Encryption and Decryption of API Request and Storage Data.
- Understanding project requirements, translating wireframes and designs into functional app layouts.

Skills

Offline Storage, Android Sdk, Core Java, Git Gps Tracking, WorkManager, MVC/MVVM, Retrofit, Kotlin, Room, Camara, Push Notification, MVVM, Data Binding, Google Maps, XML, Constraint Layout, Material UI, Creating User Interface Maintaining

12/2019 – 04/2021 **SEMReseller (Android Developer)**

- Role is to Understanding project requirements and add new module into the app and optimise the existing ones.
 - The role was to revamp their existing app into a better version of it. With better UI/UX experience
- Skills**
Offline Storage, Android Sdk, Core Java, Payment Gateways,json, Gps Tracking , Retrofit, Kotlin,MVC/MVVM , XML, Constraint Layout, Material UI, Creating User Interface Maintaining,

12/2017 – 12/2019 **Edays It solution Private Limited (Android Developer)**

- Understanding project requirements, translating wireframes and designs into functional app layouts.
 - Creating intuitive user interfaces that align with Android design guidelines, including layouts, views, and interactions.
 - Working closely with designers, product managers, and other developers to ensure alignment with project goals.
 - Integrating thirdparty APIs and services to enhance app functionality.Aadhaar Enabled Payment System (AePS)
- Skills**
Teams Collaboration, Android Sdk, Core Java, Gps Tracking , Retrofit, Kotlin , XML, Constraint Layout, Material UI, Payment Gateways, PushNotification, Creating User Interface Maintaining, MPOS Device Integration

CERTIFICATES

2021	Completed Android Developer course	Certificate link
------	---	-------------------------

EDUCATION

2017 - 2020	MCA (Masters in Computer Application) Swami vivekanand subharti university meerut, up	Post Graduation
2014 - 2017	BCA(Bachelor of Computer Application) Mewar Institute of Management, Ghaziabad	Graduation
2010 - 2014	High School Rajkiya Sarvodaya Bal Vidyalaya West Vinod Nagar Delhi-92	School

LANGUAGES

English - Full Professional Proficiency, **Hindi** - Native
